

Environmental Award

MS SMAG 2022

You are on a Green Restaurant. We meet Green Restaurant's stringent environmental requirements, which include both concrete efforts on limiting the use of resources within the building, but also in terms of preparing the food.

We make it easier for you to choose sustainably – without compromising your dining experience.

Green Restaurant is a Danish invention and a sister label to Green Key, which is an eco-label available worldwide, awarded to tourism businesses in more than 60 countries.

Du er på en Green Restaurant. Vi lever op til Green Restaurants skrappe miljøkrav for spisesteder, som både gælder for bygning, men især for tilberedning af maden. Vi gør det lettere for dig at vælge bæredygtigt - uden at det går ud over din madoplevelse.

Green Restaurant er en dansk opfindelse, men søsterordningen Green Key, som er turismens internationale miljømærke tildeles turismevirksomheder i flere end 60 lande.
